

Integrating Multiple Shopping Carts Simultaneously

To integrate your shopping cart system, use the Cart Integration Wizard. Choose the cart system you're using in the dropdown list and click the **Continue To Next Page** button.

Check to see if the cart/checkout system you're integrating with is in the drop-down menu. If given the option, always choose the shopping cart instead of the merchant account.
Example: If you're using PayPal payments with PHP Audit, choose PHP Audit. Not PayPal.

Cart or Merchant To Integrate	1ShoppingCart
<input type="button" value="Continue To Next Page"/>	
Generic Tracking Pixel	

On the following page, click the **View Integration Instructions & Processing Code** link.

Integration Instructions		
Current Integration Profiles	Optional Variables	Integrate This Cart / Merchant
PayPal - Buy Now & Subscriptions	Already Configured - Read PayPal Manual	View Integration Instructions & Processing Code
1ShoppingCart	Not Available For This Integration	View Integration Instructions & Processing Code
X-Cart	Not Available For This Integration	View Integration Instructions & Processing Code
ClientEver	Edit Optional Variables	View Integration Instructions & Processing Code

After clicking the link, you'll be taken to the integration instructions for the cart you've enabled in the Wizard. Follow these instructions to complete your cart integration.

Repeat This Process

If you have more than 1 cart to integrate, simply repeat this process as many times as needed to get all your cart systems and/or merchant accounts integrated. Notice in the above screenshot we have multiple cart systems enabled.
